Personal Information

I am currently studying Software Engineering with a focus on web development. For front-end development, I primarily use React.js and I am also interested in learning Angular.js. As for back-end development, I have experience with Node.js. Furthermore, I am skilled in using MongoDB and PostgreSQL for database management. I have also created a website, which can be accessed at https://elgeyomarakwetcountyyouthbunge.co.ke/
